Video: How to Acclimate Carnivorous Plants to Your Home

1. Once you receive your plants you will need to **acclimate** them or adjust them to your growing conditions to make sure your plants grow well.

What are some things in your classroom or house that you should check on to make sure your plants grow?

2. Some plants need high humidity. Draw how you would lower the humidity slowly over 5 days using a plastic bag.

Day 1	Day 2	Day 3	Day 4	Day 5
